Linking Materials to Implant Manufacturing

INVIBIO CUSTOM SOLUTIONS

We understand biomaterials. We revere their integral connection to the device life cycle. In addition to category-defining biomaterials, Invibio offers services that help device companies optimize each stage of product development from concept to commercialization. By collaborating with customers to streamline, manage, or outsource critical processes, Invibio ensures their success by creating efficiencies and improving outcomes. We deploy our specialized knowledge and capabilities. You save valuable time and resources.

HIGHLIGHTS

Manufacturing processes and environments – Invibio has the specialized processing technologies within controlled manufacturing environments, to help customers realize their implant designs.

Development and validation engineering – Our product and process development, engineering and quality experts work with medical device companies to bring concepts to life.

Project and supply management – Considering new ways to outsource the management or logistics of a PEEK-based project? Invibio is uniquely equipped to move your projects forward.
